Our customized solutions help businesses engage with their customers, partners and staff, using innovative applications that enhance and accelerate the exchange of critical information. We help solve challenging business and technology issues.

WE MANAGE AND CONNECT

In today's marketplace it is essential that businesses and governments stay ahead of the curve, which means that maintaining and building a proper infrastructure is important, but your budget needs to stay intact. We understand that companies have to control their budgets, while also developing their IT projects and infrastructure that is crucial to their success. That is why we are committed to achieving cost-effective quality solutions for our customers.

WHAT WE DO
Systems Integration

Systems Integration SHS is highly skilled in requirements development, interface development, conversion, testing, system implementation, training and project management. Every business is unique and while there are lots of industry -specific products available, sometimes that product will not meet your specific and unique needs. We are experienced in providing custom-tailored product solutions to meet your mission critical business needs and technology standards at enterprise levels.   We help you to analyze, plan, design, develop, test, and deploy your technology projects with successful technology solutions.

COTS

It is critical to identify, evaluate, and select the right COTS product for your business.   In order to properly evaluate what your business may need we have to become the business expert and fully understand the challenges you are trying to solve. This will enable us to recommend technology to properly solve your business problems; helping you to have success from the start. There are many COTS products on the market directed to specific industries, knowing which one is best for your business is how we can help you save valuable time and money.

Staff Augmentation

Having the right people is critical to any successful project. We can help with the right staffing needs whether it is to staff an interim technical architect or the need to tackle an immediate project we can help you eliminate the challenges you face during the recruitment process while reducing fixed costs, and improving the availability of experienced professionals.
